With Peptides UK, you are guaranteed 98% purity on all our products. Details What is Ipamorelin? Ipamorelin is a peptide selective agonist of the ghrelin/growth hormone secretagogue receptor and a growth hormone secretagogue. It is a pentapeptide with the amino acid sequence Aib-His-D-2-Nal-D-Phe-Lys-NH₂ that was derived from GHRP-1. Supplied for Research Purposes Only [hop over to these guys](#)

Click Here to Buy Ipamorelin 2mg Ipamorelin is a pentapeptide, meaning that its structure is comprised of five amino acids. It is a GH secretagogue, and is considered to be an agonist, meaning that it possesses the ability to bind certain receptors of a cell and provokes a cellular response.

Was using Ipamorelin/Sermorelin for a while but that's hard to get consistently from the available pharmacies also. So I've been using straight Ipamorelin at a dose of 300 mcgs nightly/5 nights per week. Is this peptide alone at this dose going to do much? I could probably get an Ipamorelin/Sermorelin mix if that's much better. [visit this site right here](#)
