Clen-Max - a drug with the active substance Clenbuterol Hydrochloride, which is taken by athletes and bodybuilders to speed up the metabolism and for efficient fat burning in the drying period. Clen-Max can be ordered in the form of tablets (the most common choice among athletes), injections and capsules. Available in a blister pack of 20 tablets, 40 mcg each. The dosage of the drug depends on body weight and the body's response to side effects. For men, the average dosage is 100-140 mcg, for women - 80-100 mcg per day. Reception should start with 1 tablet a day and, taking 1 more tablet every day, achieve the required dosage. [in the know](#)
