Each ml of Test Prop contains 100mg of testosterone propionate in ethyl oleate (base oil). GP Test Prop is injectable steroid which contains the hormone Testosterone Propionate in preparations of 100 mg per ML. The Propionate ester is much faster acting (2-3 days) than Enathate or Cypionate, and thus requires a more frequent injection schedule such as every day or every other day in order to keep blood levels as stable as possible. #medical #medicalstudent #medicine #doctor #medicalscool #medstudent #medschool #neet #aiims #mbbs #nurse #medlife #medicalhumor #medschoollife #surgeon #dentist #physician #physicianassistant #gynae #mbbslife #mbbsstudent #medicalassistant #medico #medicalassistant #medico #medicalmemes #instadoctor #doctormemes #mbbsdiaries #memes #meme

New studies have shown that it common for certain bacteria-invading viruses to contain a nucleotide not found in other organisms, known as the Z-nucleotide. The DNA bases usually found in DNA are guanine (G), cytosine (C), thymine (T), and adenine (A). These molecules code for all the proteins found in an organism.

The most common dosage plan for testosterone propionate (males) is to inject 50 to 100mg, every 2nd or 3rd day. As with the more popular esters, the total weekly dose would be in the range of 200-400mg. As with all testosterone compounds, this drug is most suitable suitable for bulking cycles of training.
