Winstrol, otherwise known as stanozolol, is one of the most commonly known steroids in the world. Most of the coverage of the steroid began in 1988, when Ben Johnson defeated his competition in the 100m sprint with a time of 9.79 seconds, shortly followed by testing positive for Winstrol. Stanozolol (Winstrol) is considered to have a more powerful anabolic- to-androgenic effect when compared to testosterone. A derivative of dihydrotestosterone (DHT), stanozolol (Winstrol) has been medically used to treat hereditary angioedema, venous insufficiency, osteoporosis, and skeletal muscle injury.
