Turanabol (Tbol) is one subtle oral anabolic-androgenic steroid (AAS) that bodybuilders can use for their bulking or cutting workout program. Turanabol is as effective as Dianabol, but with fewer side effects. Using Turanabol will not cause estrogenic side effects like water retention. Turinabol is typically taken in doses of 20 to 40 mg (2-4 tablets) per day by athletes, compared to 5 to 15 mg for females per day. Sticking to the recommended dosage is crucial because varying from it can have unfavorable effects. You can increase the dosage to 40 mg per day if you weigh more than 90 kg and are no longer a new steroid user. 31.00 € Add to basket Categories: All categories, Oral Tags: 10 MG/100 TABS, TURINABOL Description Reviews (0) Description Turinabol Strength: 10 mg Molecular Formula: C₂₀H₂₇ClO₂ Molecular Weight: 334.88018 g/mol Active Ingredient: Chlorodehydromethyltestosterone CAS number: 2446-23-3 Dosage Form: Tablet Route: Oral Market Status: Prescription [more helpful hints](#)
