As for the recommended dose, the athlete obtains interesting information from the German package insert by Schering AG for their compound Primobolan S: "Unless otherwise prescribed the following guidelines apply: The dosage should be 1 - 1,5 mg per pound of body weight/day, that is 4-6 tablets for 100 pound of bodyweight." For men, we recommend 50 - 100 mg daily for beginners. Intermediate to advanced athletes may use between 100 - 200 mg per day. A few days after the cycle has come to an end, (PCT) should begin. The drug should not be taken for more than 2 months because there is an increased risk of side effects, and it will reduce the drug's effect. [pop over to this website](#)

Primobol is also a very popular steroid with women bodybuilders where it's low androgenic properties and mild nature makes it a very safe choice for them to use. Male bodybuilders often use Primobol in a dose of 300-800mg a week, anywhere from 8-16wks, while women find that a dosage 50-100 mg will generally yield desirable results. Produced by: Alpha Pharma Quantity and Dosage: 50 pills - 25 mg Active Substance: Methenolone Acetate Prescription: NOT needed. Delivery to: USA, Australia, Canada, UK, EU, Asia, and worldwide.
