D-bol was generally used during the recovery period in post-burn therapy. Also, it is sometimes prescribed to women to improve body tone. A full-fledged Dianabol 20 solo cycle uses up to 200 tablets. In this case, the cycle duration is up to 8 weeks. It is advisable to take this steroid, gradually increasing the dose from 20mg per day to 50mg per day. Take the pills with meals, while drinking plenty of water. This gradual increase has a positive effect on the results.
