Saizen®(Somatropin) - EMD Serono

Saizen ® (somatropin), a recombinant human growth hormone (r-hGH), has been proven to mitigate growth disturbances in patients with growth hormone deficiency, growth failure due to Turner Syndrome in girls, growth failure in prepubertal children due to chronic renal failure (CRF), and short children born small for gestational age. 1 Specific indications vary across the 80 countries in which. Saizen is manufactured by a German company by the name of Merck and commands approximately 8% of the worlds growth hormone market. Saizen comes premixed in cartridges and can be used with their EasyPod delivery device or drawn out with a syringe; either method is effective. *Saizen is produced by recombinant DNA technology and has a sequence identical to that of human GH produced by the.
