Testosterone Enanthate: Uses, Dosage, and Side Effects

T enanthate at a dose of 300 mg/week was no more effective than 100 mg/week. The dose-dependent suppression curves were parallel for the hormones, sperm counts, and sperm concentrations. Men who received 100 mg and 300 mg T enanthate per week had higher T levels than the men treated with sesame oil. Testosterone enanthate is used in women to treat breast cancer that has spread to other parts of the body (metastatic) and cannot be treated with surgery. Testosterone will not enhance athletic performance and should not be used for that purpose. Testosterone Enanthate may also be used for purposes not listed in this medication guide. Warnings

Testosterone Enanthate Injection, Usp

Testosterone enanthate is a clear or yellowish fluid that comes in a 5-milliliter (ml) glass vial. It is injected into a buttock muscle every one to four weeks. To avoid large changes in hormone levels, and the mood swings that may come with them, lower doses are often used over shorter intervals.
