

# V Med Clenbuterol | [AAR-7267] V.med Clen 40mcg - Clenbuterol Hydrochloride ...

V.Med CLEN 40. Clenbuterol is not an anabolic steroid, but rather a stimulant that belongs to a classification of compounds known as sympathomimetics. This classification (or 'family') contains other compounds that the average person might be more familiar with, such as: caffeine, ephedrine, albuterol, amphetamines, cocaine, and many others. Clenbuterol is a compound that belongs to a class of drugs called beta2-agonists. Drugs in this category can cause dilation of the bronchial muscles. Beta2-agonists are often used to treat asthma..

## V.MED CLENBUTEROL - SA Shop

Clenbuterol is a quite strong anti-catabolic / thermogenic drug that is not a steroid. During dieting periods, or post steroid cycles, this drug has reported dramatic effects on body composition. Since it suppresses the muscle wasting effects of cortisol/cortisone, a slight increase in total muscle protein synthesis was seen.

Description Clenbuterol is not an anabolic steroid, but rather a stimulant that belongs to a classification of compounds known as sympathomimetics. This classification (or 'family') contains other compounds that the average person might be more familiar with, such as: caffeine, ephedrine, albuterol, amphetamines, cocaine, and many others.
