Description. Alphabol is an anabolic and androgenic steroid on the basis of methandienone. We can say that this steroid is the "coryphaeus" of the market of sports pharmacology. Initially, methandrostenolone was used exclusively as a medical preparation to increase the overall tone in women and accelerate recovery from burns. CONDITIONING it isn't normal to them so they approach it with one foot in and one foot out talking themselves out of it before even giving it a chance
