Dianabol only. Take 30-50mg of Dbol each day (preferably when you eat) for a cycle of 4-6 weeks. Dianabol cycle results: it is not uncommon to gain 7-15lbs lean muscle mass during a Dbol cycle. Now before you think 'what the hell', this is LEAN mass meaning you will initially have more at the end of... I had a client with Down syndrome who has been stuck in his house for the better part of a year, watching YouTube. Who loves to be active, participate in sport, be social.. have our first kickass workout of 2021... who fell asleep in the car immediately because it was the most energy he has expanded in a long time. Dianabol 50 containing the active ingredient Methandrostanolone (50 mg) is considered an androgen and anabolic steroid medication. This anabolic steroid has a much greater fame under the slang name as "Dbol". Molecularly, it is very similar to testosterone, but it has a less pronounced androgenic...
