## Test Tren Bold Winstrol

DBol Dosage in a Test-E Dbol Cycle. Jump-start production of new muscle tissue with 25 to 30 mg of D-bol a day for the first four weeks. D Bol has a half-life of about 5 hours, so if you choose to go with 30mg per day. Ideally you should take 10mg in between meals after every five hours.

Test ETren EDbol. ad. STATS, DESCRIPTION, GOALS. EDIT\*\* - Revise my cycle after some well laid out arguments. Now my cycle is an accurate depiction of what I've done thus far. Ignore the test trumping the tren in the beginning. I'm now doing Tren@650 and Test@400.
