Nurse: What happened to this one, doctor?

Doctor: He was so open-minded his brain fell out.

Testosterone mix a unique steroid in that it blends four testosterone esters, (propionate/ isocaproate/ decanoate/phenylpropionate) each with a different release time. By having several esters the user gets an immediate surge (from the prop) and yet does not have to inject as often since the other esters continue to release androgen into the ... #playing #game #life #smile #grandmother #christmastime #music #power #everyday #everyage #long #togheter #organ #percussion #TempoAltrove #LaBuenaVentura Testosterone enanthate is an oil based injectable steroid, designed to slowly release testosterone from the injection site. Serum concentrations of this hormone will rise for several days and remain elevated for about two weeks. It may take up to three weeks for the action of this drug to fully leave your system.
