An effective daily dose for athletes is around 15-60 mg/day. The dosage of Dianabol taken by the athlete should always be coordinated with his individual goals. Steroid novices do not need more than 15-40 mg of Dianabol per day since this dose is sufficient to achieve exceptional results over a period of 8-10 weeks. METHANDIENONE Tablet (10 mg) Dianabol is another name for the oral steroid methandrostenolone or Methandienone. It is a derivative of testosterone, exhibiting strong anabolic, and moderately androgenic properties. This compound was first made available in 1960, and it quickly became the most favored and widely used anabolic steroid in all forms ...
