Sustanon is an oil-based testosterone blend. Sustanon is an injectable steroid with 4 testosterone esters: propionate (30mg), phenylpropionate (60mg), isocaproate (60mg), decanoate (100mg). Esters create a depot on the spot of administration, and from within the muscles the hormone is released in sustained manner. #vulve #anatomie #reproductionfeminine #girl #girlpower #gynecologie #gyneco #medecine #medecineesthetique #esthetique #aesthetic #aesthetics #doctor #drelfalhrose #beauty #health #beaute #esthetiqueparis #paris #loveyourself #selfcare #bodypositive

Sustanon 250 injection is called a depot injection. It's injected deep into a muscle, for example in the

buttock, thigh or upper arm, where it forms a reservoir of testosterone that is gradually... Rasterization of the testosterone molecules provides for a sustained release of testosterone from the injection depot into the blood plasma. Sustanon is a very popular anabolic steroid product among those that use anabolic steroids for muscle building purposes. Advantages. The results of the use of Sustanon are excellent and they are ...

Sustanon 250 is a commonly prescribed drug for treating low testosterone levels in men (TRT). This steroid compound is used by athletes and bodybuilders to gain muscle mass and increase strength. Testosterone acetate is a fast-acting drug that comes in the form of the male testosterone hormone. It dissolves faster in your bloodstream which makes it ideal for many patients or athletes. Upon application, the acetate ester starts working almost immediately contrary to other testosterone esters that might take some time.

Sustanon dosages are around 200 mg to 1000 mg per week. Steroid Class: Sustanon (Testosterone) is the parent steroid from which every other steroid, and each subsequent steroid class, is derived. Primary Use: Naturally produced by both men and women alike, testosterone is essential for the normal physiological functioning of both sexes. I mactually staying consistent this time while trying to regain my fitness and lose some weight. I ve started and stopped over the past two years so many times I can teven count. In hindsight, I saw small progress as no progress, and said fit. I m successful this time because I m not shooting for perfection. I m doing this to 1. Be healthy and 2. Because I love it! Unlike Sustanon 250, testosterone enanthate is a derivative of endogenous angrogen testosterone instead of being a combination of testosterone esters. This singular ester is designed to provide guys with higher levels of free testosterone as it actively works. It is usually given in a 200mg solution, so the dosage is lower than the base dosage ...
