

#1 My doctor has increased my test cyp dose from 100 to 150 then to 200 per week. Though I realize it matters what effect the dose has on your testosterone level, should one expect to get boost in muscle mass at 200 per week or would it take a much higher dose? ★★★★★

Weeks 1-4: 200 mg of testosterone cypionate; Weeks 5-8: 300 mg of testosterone cypionate . In each of these scenarios the total weekly testosterone dosage is the same. For example, consider an individual on a TRT protocol of 200 mg of testosterone cypionate per week. The individual may choose to inject 200 mg once per week, or 100 mg twice .

Pharmacology of testosterone replacement therapy preparations

TABLE 2
FDA-approved testosterone formulations²

Formulation	Trade names	Dosing, route, and administration	Benefits	Potential adverse effects or drawbacks
Testosterone cypionate, testosterone enanthate		75-100 mg IM every week or 150-200 mg IM every 2 weeks	Short-acting preparation that allows for drug withdrawal in the event of adverse effects	Fluctuation of testosterone levels
Testosterone undecanoate	Aveed	750 mg IM followed in 4 weeks by another 750 mg IM, then 750 mg every 10 weeks thereafter	Steady-state testosterone levels without fluctuation	Long-acting formulation; does not allow for rapid discontinuation of therapy if adverse effects develop
Transdermal and transmucosal testosterone	Androderm (patch)	A single, 2-6-mg patch daily	Most closely mirrors physiologic testosterone levels	May cause skin irritation; risk of transfer to partner or children
	Axiron (axillary)	30-120 mg daily		
	AndroGel, Testim, Vogelxo (gel)	50-100 mg daily applied to shoulders, arms, or abdomen		
	Fortesta (gel)	10-70 mg daily applied to thighs		
	Natesto (intranasal)	11 mg 3 times daily		
	Striant (buccal)	30 mg every 12 hours		
Oral testosterone	Androxy (fluoxymesterone)	5-20 mg daily in a single or divided doses	Daily oral dosing	Difficult to obtain normal physiologic levels; risk of hepatotoxicity
	Android, Methitest, Testred (methyltestosterone)	10-50 mg daily		
Subdermal testosterone pellets	Testopel	150-450 mg implanted subcutaneously every 3-6 months	Long duration of action	Infection at implantation site; explantation

IM, intramuscular.

My doctor prescribed 200 mg testosterone cypionate per week. The first 4 weeks I took 200 mg Depo Testosterone per week which came in 1cc vials. I self injected every Friday evening. After 4 weeks I received a generic brand when I refilled the prescription. The new brand was 200 mg Perrigo which also came in 1cc vials.

Benefits of Taking Testosterone Cypionate (Depotestosterone) | Optimal .

Testosterone Cypionate

7 Day Half-Life

The "half-life" suggests how much time a medication will stay effectively in your body. In this case, the half life suggests it's in your body 14 days total. "Half" spent working on the body. The other half spent exiting the body.

Ester Benefits

Because this ester of testosterone stays in the body for so long, it only needs to be administered 1x weekly.

Warning

If you are prescribed this medication and it's only administered once every two weeks, your provider has you on a hormonal rollercoaster. Contact us for a free, no obligation consult.

AAI REJUVENATION CLINIC

IM testosterone cypionate: 50-400 mg every 2-4 weeks: Supratherapeutic T levels 4-5 days after dose and subtherapeutic day 14: . 100 mg weekly, 200 mg every 2 weeks, 300 mg every 3 weeks, or 400 mg every 4 weeks. Serum testosterone was measured weekly during the initial treatment period of 12 weeks. After receiving the last dose of the .

Testosterone Cypionate: Benefits, Side Effects, Dosages

9 Possible Testosterone Cypionate Side Effects

- Acne
- Stomach pain (with oral tablets)
- Erectile dysfunction
- Hair growth
- Male pattern hair growth
- Chest pain
- Muscle pain
- Rapid weight gain
- Raised blood pressure

An ideal Testosterone Cypionate cycle for beginners would be a 200 to 400 mg dose of the steroid weekly. You should do this for a total of 12 weeks. Depending on your needs, you may add other drugs like Dianabol or Anadrol into the cycle. The Bottom Line. Testosterone Cypionate is the ideal entry-level steroid.

Is 200mg/week TRT enough to add muscle? - AnabolicMinds

How much Testosterone Should I Inject? Choosing the Right Testosterone .

In a TRT setting, Testosterone Cypionate doses commonly range from 100-200mg every 7-14 days, and in some cases every 21 days. Let's be very clear, regardless of the dose, any plan that calls for injections to be less than every 7 days is inefficient and represents a physician who does not fully understand TRT therapy.

Testosterone Cypionate Intramuscular: Uses, Side Effects . - WebMD

Most physicians would consider an optimal testosterone dosage of 1cc of testosterone cypionate or testosterone enanthate, 200 milligrams per ml, every 14 days. More experienced clinicians are comfortable with treating patients with 200mg/cc of Testosterone Cypionate weekly or twice weekly. The half of testosterone cypionate is eight days. It is our opinion that testosterone should be provided .

200 mg Of Testosterone Per Week | Results, Side Effects

Testosterone Cypionate dosage bodybuilding. The objective weekly dose of testosterone cypionate is 300-1000 mg per week. Again, I advise you not to rise above 500 - 600 mg. This is more than enough. The frequency of injections (until you learn to individually approach this point) is one to two milliliters every third, fourth day.
