0:00 / 21:05 Russo talks with Enhanced Labs' CEO and biochemist, Trevor Kouritzin, and he breaks down the last legal prohormone, 3-AD. Describing how it stacks with other.

What is 3AD™? - United Nutra™

The Dymethazine (D-Zine) prohormone became rapidly popular a couple of reasons but mainly by his "good gains side like Superdrol with lower side effects". The active compound of Dymethazine (D-Zine) prohormones is 2,17-dimethyl-5-androstan-17-ol-3,3'-azine (17b-hydroxy-2a,17b-dimethyl-5a-androstan-3-one-azine). This is a methylated .

Side Effects of Prohormone That You Should Not Take Lightly

Let me explain them. As I mentioned, prohormones are hepatotoxic (liver damaging). They also can, and most likely will, mess up your lipid panel. For those of you that are medically challenged, prohormones raise bad cholesterol levels, cause an increase in blood pressure, can cause headaches, hypertension, dizziness, etc.

Has anybody here had any experience with Enhanced Athlete 3-AD?

Aside from the fact that harsh side effects were barely made mention of ? hair loss isn't a harsh side effect. It's more like a harsh truth of life. This product did not effect my hairline whatsoever. To note, I am and have been using Nizoral for the past 4 months.

Some of the long-term side effects are infertility and baldness. If you use it extensively, it is more likely to cause hair loss as it tends to reduce the production of testosterone in the body over a period of time. One of the most common effects is the appearance of acne on the face and body of the user.

Are Prohormones Safe?: The Side Effects - TestoFuel Blog

1. Increased aggression. The wife said I was pretty pissy when I was on 3-AD. Then again, she was 7 months preggo at the time, too. 2. Lethargy. Not seen by everyone, and it only lasted a few days. It came on week 2 and left at the end of the week. A good pre-w/o stim helped me drive right through it. 3. Increase sweating. like a piggy pig!

1-ANDROSTERONE - Uses, Side Effects, and More - WebMD

Potential Risks and Side Effects Like any prohormone, 3-AD may carry some risks and potential side effects. These may include: a) Liver Toxicity: Some prohormones can put stress on the liver due to their metabolism process. It is essential to monitor liver health and consider using liver support supplements during a 3-AD cycle.
