## 4-chloro-17a-methyl-androst-1,4-diene-3,17b-diol - ChemicalBook

Overview 4-Androsterone is a type of chemical known as a "prohormone." These chemicals are changed by the body to other "muscle-building" hormones such as testosterone. Very little is known about.

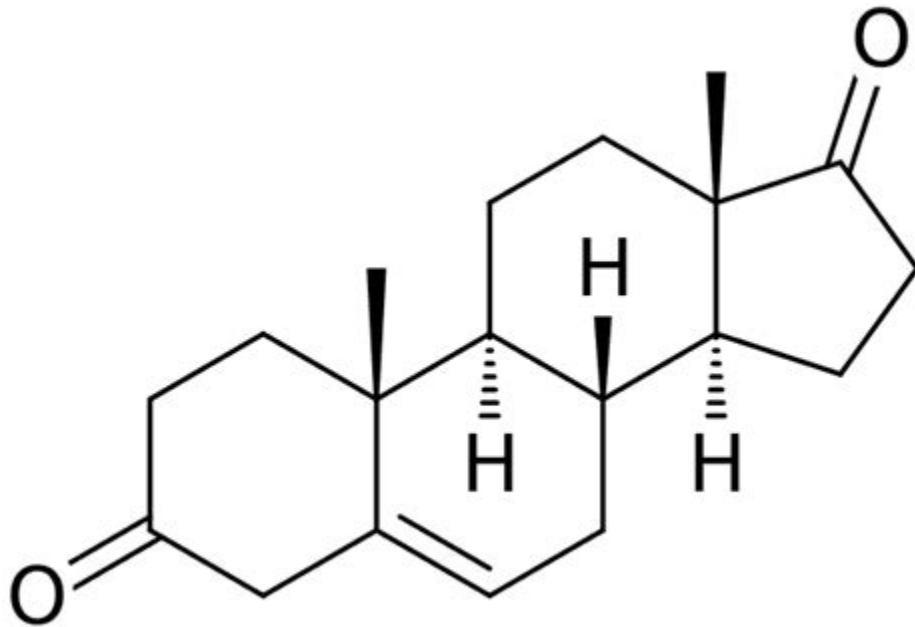

### Promagnon - steroid

Profile The chemical makeup of Halodrol is 4-chloro-17a-methyl-androst-1,4-diene-3b,17b-diol. There is a structural modification (17a-methyl) that allows the compound to survive the first pass through the liver. This is what makes it extremely orally bioavailable but also liver toxic. Note, Halodrol is a testosterone derivative. Dosages

## Androstenedione - Wikipedia

4-chloro-17 a-methyl-androst-4-en-17b-ol3-one I have been doing my research but cant seem to find anything about this compound. There are compounds similar to it but not exactly the same. I have Extreme Shred by Anabolic Technologies and this is the main ingredient. Im going on a cut soon and was wondering if this compound is any good for cutting ?

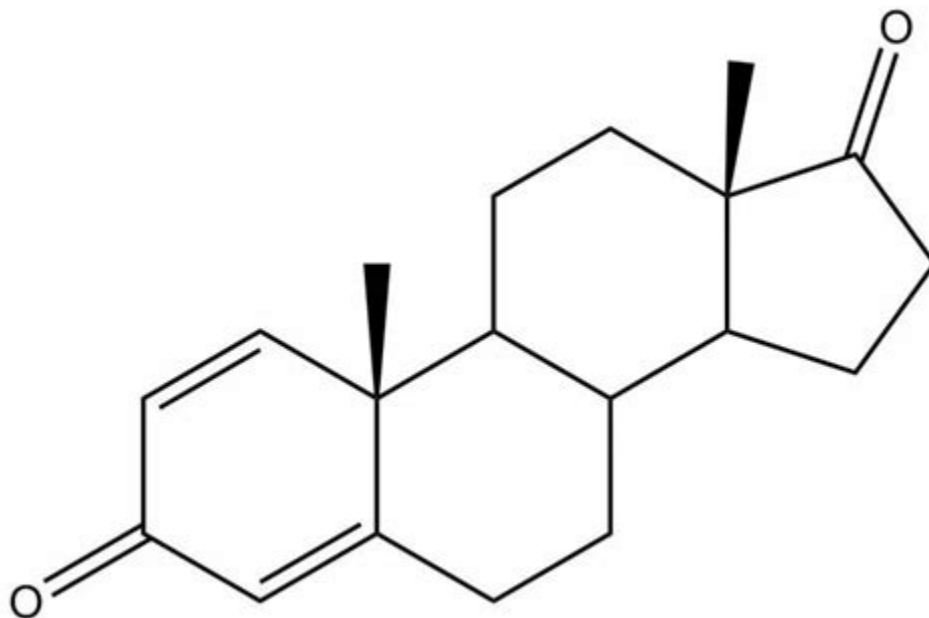

### The Promagnon / P-Mag Prohormone Profile Guide

# PROMAGNON P-MAG PROHORMONE PROFILE

As with most of the prosteroids now in use today, the gains on 4-chloro-17a-methyl-androst-1,4-diene-3b,17b-diol will be lean and dry, with most users reporting seeing gains of around 8lbs during a 5 week cycle, with noticeable fat loss in the process. Possible side effects No true anabolic

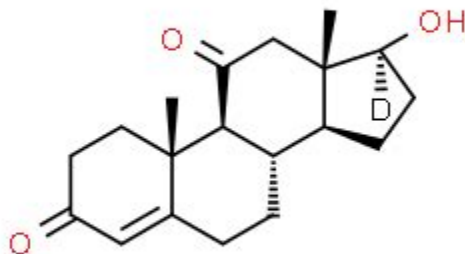

androgenic product ever comes without side effects .
