

Masteron neither builds muscle nor burns fat and will shut down your natural test and possibly estrogen which will leave you feeling like shit. Masteron alone would be totally worthless especially for what you want. Do a SARMS cycle because these questions are revealing to you not being ready. No offense.

#1 kosp Member Hello, let's try again. I am gonna pin Test Cyp and Mast E for 12 weeks straight. My idea is simple, 2ml x 2 weekly. 1ml of test cyp and 1ml of Mast E, which is 500-400 respectively. Likely some oxa in the end for getting some nasty veins, but those are just candies. Experiences with these two compounds together?

It's a lot of food especially going the clean route. Honestly though the fast acting esters for bulking isn't ideal. Sustanon isn't bad though. I prefer something like 400-500mg of Test Enanthate and 300-400mg of Deca. Great bulker and you can add in 50mg of Anadrol for the first 4-6 weeks to jumpstart the cycle.

Moderate Masteron Cycle

A moderate Masteron cycle is perfect for a mild cutting plan or for the purpose of enhancing athletic performance. Such a Masteron cycle will produce results that are largely dependent on your diet, but most men will find such a plan is very well-tolerated. If you've never used this steroid and you're looking for a moderate boost, the following Masteron cycle may be for you:

Week	Masteron	Testosterone Propionate	Trenbolone Acetate	Anavar	Arimidex
1	300mg/wk	200mg/wk	30-50mg/ed		0.5mg/2-3x/wk
2	300mg/wk	200mg/wk	30-50mg/ed		0.5mg/2-3x/wk
3	300mg/wk	200mg/wk	30-50mg/ed		0.5mg/2-3x/wk
4	300mg/wk	200mg/wk	30-50mg/ed		0.5mg/2-3x/wk

8	300mg/wk	200mg/wk	30-50mg/ed		0.5mg/2-3x/wk

Note Arimidex may or may not be needed.

Intermediate Masteron Cycle:

An intermediate Masteron cycle can be used for cutting or athletic performance. However, most athletes will not need such a Masteron cycle and will be happy with the moderate plan listed above. The intermediate Masteron cycle is perfect for all levels of steroid use experience with the exception being first time steroid users. If you have steroid use experience, with or without Masteron experience, the following Masteron cycle can be implemented.

Week	Testosterone Propionate	Trenbolone Acetate	Masteron	Winstrol	Arimidex
1	100mg/ed				0.5mg/ed
2	100mg/ed				0.5mg/ed

COACHING My Account Masteron 101 May 26, 2016 by John Doe Masteron is primarily used to give your muscle a granite hard, grainy look to them that no other steroid can duplicate. Normally the cycle length is 8 to 10 weeks and it should be combined at least with a testosterone steroid (ideally Testosterone Propionate for compatibility), while it also delivers excellent results when used with more powerful steroids like Winstrol or Trenbolone.
