Methenolone Acetate Oral - Primobolan 200 Pip matches ...

This means you would be required to make several very painful injections every week to get enough primo in your system. To help solve this problem there has been the increase in underground labs (UGL), which make primobolan in 200-300mg/ml vials using other oils to make PIP less pronounced. Medical Uses 200 mg for me from one lab was like injecting battery acid. The pip was so bad it effected my training. I stick to 100 mg/ml now because I inject it daily with a slin pin in multiple areas, so I do not want any pip. So I'll pin pats, traps, tris, delts, rear delts and so on. Nothing sucks worse getting pip in your last, lol.

Primobolan 200 . ad. These came in super quick, already placed another order.. and I have noticed a little weight gain already. also PIP is pretty bad feels like I got shot with a rubber bullet. is this normal? got me kind of worried because I wasn't expecting to notice anything this soon although I am super lean so maybe my body metabolized.
