Pt-141 3mg experience : Peptides - reddit

Oct 30, 2020. #1. @ironwill and a few others have posted about PT-141. Well I decided to pull the trigger on it and bought a bunch of it. Took one dosage yesterday around 5pm and 6 hours later have had raging hard on after hard on. Even waking up at night to a raging hard on. PT-141, also called bremelanotide, is sometimes referred to as the female Viagra because the peptide was previously investigated in phase IIb human clinical trials for use in treating female hypoactive sexual desire disorder (HSDD). PT-141 is a melanocortin that binds primarily to melanocortin 4 receptor (MC-4R) and MC-1R.

PT 141 Guide - Benefits, Side Effects, Dosage and More

PT 141 is a melanocortin-based peptide. It was initially developed to help premenopausal women, who experience reduced sexual desire for no apparent reason. Over the years, though, it has shown promise for everyone, including 50% of impotent males Viagra can't help.R

Jan 24, 2021. #6. Agree that PT-141 is quite unpredictable. I've never had the nausea, but it usually takes 6.5 hours to kick in, so timing is a bear. The downside for me is constant nocturnal erections which interfere with sleep. For some odd reason, the PT-141 effect for me is strongest when I'm asleep. O. [on bing](#)

What are your experiences with PT-141? (as an aphrodisiac ...

I've used PT-141 aka Bremelanotide from a couple of different sources with similar results. I usually

don't feel much until I get to 3mg and even then, the effect is very mild. Mild face flush and mild nausea but not much libido or erection wise, aside from rock hard erection while I sleep.

What are your experiences with PT-141? (as an aphrodisiac ...

PT-141 should never be used without a doctor. It is a melanocortin and melanocortins are involved in anhedonic depression. One of our members experienced anhedonia after a one time use of PT-141. One of the posters on the Peak Testosterone Forum that I admire most is Inigo.

Anyway, so 12 hours later I hadn't experienced anything so I dosed again 2mg at 8am, it is now 11:30am, 3.5 hours later or total of 15.5 hours and 3mg of pt-141 which I believe is plenty of time and also probably a high dosage. [the original source](#)
