

# Cjc 1295 Or Testosterone | Ipamorelin CJC-1295 - ManUP Testosterone Center

CJC-1295 is a modified form for Growth Hormone -Releasing Hormone (GHRH) with improved pharmacokinetics, especially in regard to half life. It is recommended to be taken at night to maximize the body's natural cycle of growth hormone. As a result, it stimulates the pituitary gland during REM sleep. CJC-1295 is one of the newest and most promising developments in anti-aging treatments. CJC-1295 is a peptide, not a hormone and it is what is known as a "secretagogue." This means that CJC-1295 triggers the secretion of your own human growth hormone through the pituitary gland, creating a natural increase with fewer side effects.

## The Problems with Testosterone Replacement Therapies ...

This is why so many clients choose to buy CJC-1295 injections, rather than trying testosterone replacement as a first choice. At the same time, because it is not solely a testosterone equivalent, it is far more effective at addressing overall age-related health changes.

CJC-1295 is a peptide hormone created by ConjuChem Biotechnologies that functions as Growth Hormone Releasing hormone or GHRH. GHRH is the hormone responsible for stimulating the release of Human Growth Hormone (HGH). [prev](#)

## CJC-1295 - Steroid.com

CJC 1295/Ipamorelin is a growth hormone-releasing hormone. It stimulates one side of the pituitary gland to release more quantities of growth hormone. There are two proteins in this compound. Ipamorelin mimics the hormone ghrelin, which is responsible for appetite control.
