## Clenbuterol 200mcg per ml x 30ml - Evolution Peptides

I have some liquid clen that is 200mcg per ml. This will be my first time taking clen so how much should I take a day? I have read 60-80mcg ed for 2 wks and then switch to eca for 2wks, I am 6ft 206lbs and just want a extra kick to lose some unwanted bf% also should I spread it around thru the day or all at once? Conversion Table. The microgram ( mcg or  $\mu\text{g}$ ) is the unit of mass in the metric system (SI, International System of Units). 1 microgram ( mcg or  $\mu\text{g}$ ) = weight of 0.001 milliliters ( ml) of pure water at temperature 4 °C = 0.001 grams (g) = 0.001 milligrams ( mg) = 0.000001 kilogram (kg) = 0.0000000352739619 ounces (oz).

I searched the threads about liquid clen including the FAQ, but I need a straight forward answer to my question. I have a bottle that is 200mcg/ml, and the faq suggests 20mcgs in the begining of cycle. How do get 20mcgs out of 200mcgs per ml. Another problem is that it isn't a graduated droper (dropper with no ml markings and lines in between)

## Buy Clenbuterol 200mcg per ml x 30ml - Guru Peptides

Clenbuterol 30 Xt Gold - Clen 200mcg Per Mi El CLENBUTEROL 100 (Clenbuterol o Clembuterol hydrochlorido) 100 Tabletas30mcg XT Gold debe iniciarse con una dosis de 20 mcg. Se pueden usar dosis más altas después de evaluar la tolerancia, pero se recomienda precaución con dosis más altas debido a la potencia del medicamento.

If your bottle of liquid clen is 200mcg / ml and you want 20mcg you need 1/10th of a ml.  $200\text{mcg} * (1/10) = 20\text{mcg}$ . Make sure you that makes sense to you. 1ml = 1cc 1000mcg = 1 mg I would probably measure this out in a insulin needle so you can be sure you're dosing this properly. 100iu = 1cc = 1ml so you'd take 10 iu for your 20mcg.
