Anapolon 50 mg is an oral product that is often used by bodybuilders in a steroid cycle. The active substance of this medication is Oxymetholone. Original Anapolon 50 mg is produced by the world famous brand Eminence.

Deca stacked with Anadrol is a popular combination, particularly off-season. This can provide quick results but like Deca itself is not highly androgenic. That's because Anadrol does not have a strong affinity for androgen receptors and instead works by enhancing protein synthesis. This makes it very potent at boosting muscle mass. [her response](#)
