Pharmacokinetic properties of testosterone propionate in ...

Testosterone injection is used in men and boys to treat conditions caused by a lack of this hormone, such as delayed puberty or growth.

The pharmacokinetic characteristics of testosterone propionate were studied in normal men after a single im dose of 25 mg testosterone propionate-19,19,19-d₃. Plasma levels of testosterone propionate-19,19,19-d₃, its active metabolite testosterone-19,19,19-d₃, and endogenous testosterone were measured by gas chromatography-mass spectrometry.
