The Intuitive Eating workbook challenges you to not finish a meal, leaving a bite or two. It's a huge mental challenge for me, but today I did it. I totally planned on eating all of this (Trader Joe's Chicken Enchiladas--not that great tbh) but then I started FEELING full. Weird. Usually I would put this feeling off to the side, but not this time. The sad thing is that counting calories probably had a hand in me eating more than I wanted or less. I would always measure everything, or whatever was easiest, so the calories were right. I ate it all because CALORIES..
