Sustanon vs Testosterone Enanthate - Sustanon Steroids

Sustanon 250 is a blend of different testosterone esters; however, it is still essentially testosterone; like cypionate or enanthate. Therefore, in terms of muscle gains, it does not matter what form of testosterone you use, as it is the same compound and thus will produce an identical end result. Sustanon 250 is a popular testosterone blend (mixture) and is without question the most popular and well known blend ever made. Manufactured by Organon, the idea behind Sustanon 250 was to provide the best of small (short) and large (long) ester testosterones in a single compound.
