Genotropin® (somatropin) For Injection Official Site | Safety Info

Genotropin Mixer®
Growth Hormone Reconstitution Device

How to use your GENOTROPIN Mixer®

Genotropin®
(somatropin [rDNA origin] for injection)

www.genotropin.com

1-800-645-1280

Since your medicine comes in a 2-chamber cartridge, it needs to be mixed. The GENOTROPIN Mixer is a device to mix your drug. To inject your medicine, you will need the following:

- GENOTROPIN Mixer with pressure-release needle
- One cartridge containing drug and liquid
- Insulin syringe for injection
- Alcohol swab
- Container for proper disposal

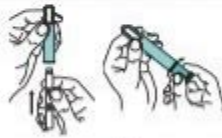

- 1 Before you begin**

 - First, wash and dry your hands.
 - Unscrew the dark green plunger rod from the light green holder of the GENOTROPIN Mixer.
 - Remove the cartridge of drug from its package.
- 2 Mixing the drug**

 - Put the cartridge into the GENOTROPIN Mixer with its metal/rubber tip facing into the open end of the holder. You should be able to see the metal/rubber tip. It should stick out from the opening at the front of the holder.
 - Screw the plunger rod back into the holder. This will mix the drug and the liquid.

Caution: Look in the window of the GENOTROPIN Mixer to make sure the medicine is completely dissolved. If it is not, gently tip the GENOTROPIN Mixer from side to side. Do this until the liquid is clear. **Do not shake!**

Look carefully at the now-mixed medicine. Nothing should be floating in it, and it should be clear. If the medicine is still cloudy, do not inject it. Take out the cartridge and return it to your supplier. Start over again with a new cartridge.

- 3 Releasing pressure**

 - Disinfect the metal/rubber tip of the cartridge by wiping it with an alcohol swab.
 - Remove the cap from the pressure-release needle. Do not touch the needle. With the metal/rubber tip of the cartridge pointing up, pierce the rubber tip with the needle. This will release extra pressure in the cartridge. Be sure the cartridge is upright when pierced. This is so the medicine doesn't spill out. (Only do this step the first time you use a new cartridge.)
 - Remove the needle from the cartridge and replace its cap. Put it in a proper disposal container.

If you are a veteran, the Department of Veterans Affairs offers COVID-19 vaccinations at VA facilities. Sign up online or call 800-827-1000 to make an appointment. More information about COVID-19 vaccines also is available at the Utah Department of Health and Human Services website. Or you can call 385-273-7878.
