## Ovidrel Trigger Shots: Uses, Side Effects, Success Rates - Verywell Family

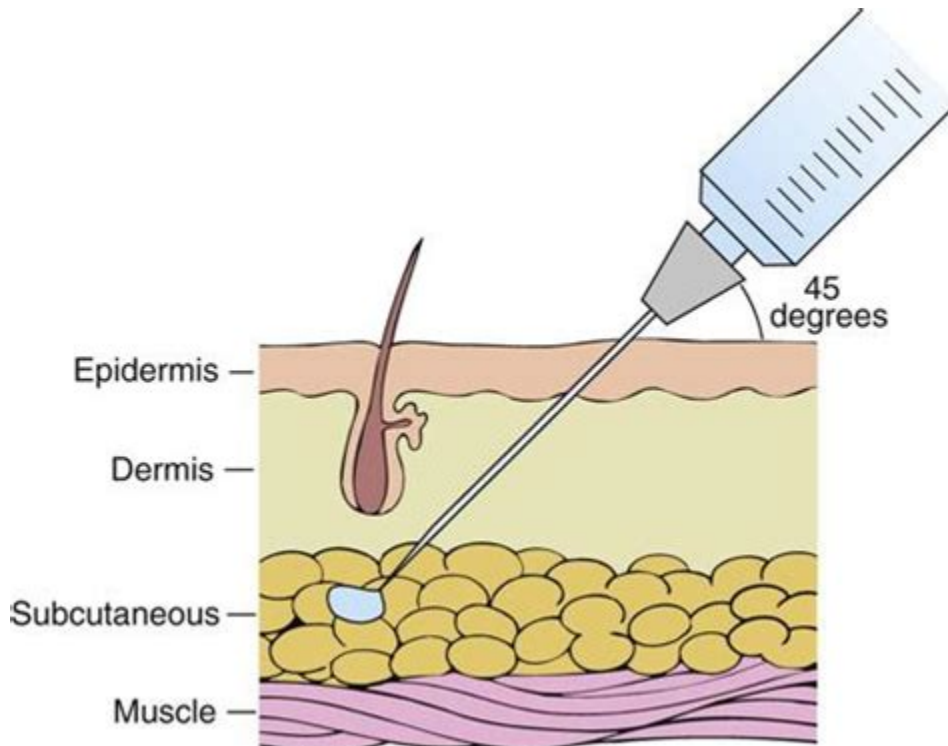

Human chorionic gonadotropin (hCG) is a hormone that's naturally made in the body during pregnancy. It's also very similar to luteinizing hormone (LH), a hormone involved in reproduction in males and females. As a medication, HCG (Pregnyl, Novarel) is used for fertility treatments in females.

## How different is compounded HCG vs Pregnyl? - Excel Male TRT Forum

Pregnyl (chorionic gonadotropin) is a hormone used to cause ovulation and to treat infertility in women, and to increase sperm count in men. Human chorionic gonadotropin (HCG) is also used in young boys when their testicles have not dropped down into the scrotum normally. This can be caused by a pituitary gland disorder.

### Chorionic Gonadotropin (Subcutaneous Route, Intramuscular Route).

Ovidrel (choriogonadotropin alfa) and Pregnyl (chorionic gonadotropin) are forms of the hormone (hCG) that causes the growth and release of a mature egg (ovulation) used to treat certain fertility problems in women. Ovidrel is usually used in combination with another hormone (FSH) that helps

cause healthy ovaries to produce eggs.

## HCG vs Pregnyl Comparison - Drugs. com

While its natural purpose differs from that of the injections, HCG reacts the same within the body as the luteinizing hormone (LH), a vital fertility hormone responsible for stimulating follicular development, mature oocyte (i. e. egg) development, and ovulation.
