info Specialty Drug testosterone cypionate Depo-Testosterone Used for Testosterone Replacement
Testosterone cypionate (Depo-Testosterone) is an injectable form of testosterone that's used to treat low testosterone in adult males. It's injected into your buttock muscle and lasts for a long time, so it only needs to be used once or twice a month.

Testosterone cypionate - Wikipedia

Testosterone cypionate, enanthate, and undecanoate are three different testosterone esters that can help boost your testosterone levels. These testosterone esters differ in many ways, but the most important difference is how long they last in your body. Testosterone enanthate lasts for the shortest time in your body.
