Sodium Propionate is the sodium salt form of propionic acid, a short chain fatty acid and food additive, with potential gastrointestinal (GI) protective activity. Upon oral administration of sodium propionate, it converts to propionic acid which may protect the GI tract and reduce incidence and severity of GI toxicity from radiation therapy. E281 propionat de sodiu. E281 este un aditiv alimentar aprobat de catre Uniunea Europeana (UE) si este un acid natural care actioneaza ca un conservant anti microbian produsele alimentare, in special in cazul produselor de patiserie. Numele obisnuit al aditivului alimentar E281 este propionat de sodiu. Poate fi, de asemenea, prezentat ca sare.

If sodium propionate is ingested or applied topically in an acid media, it becomes propionic acid. It oxidizes fatty acids, lowers pH values, and facilitates the citric acid cycle through interaction with coenzyme A. There has been evidence of heightened production of insulin in cows and sheep; the insulin later settles to an overall lower level.

E281: Propionat de sodiu. Origine: Sarea de sodiu a acidului propionic, un acid natural prezent în cantități mici în multe produse alimentare, uneori în cantități mari este produs de bacterii în produsele fermentate, cum sunt anumite tipuri de brânză elvețiană. Este de asemenea produs pe scară largă de către bacteriile din intestine. [click over here](#)

Anmol Chemicals is the pioneer manufacturers of Sodium Propionate, Pharmaceutical Excipients Fragrance & Flavor chemicals in India. We offer Halal and Kosher Sodium Propionate made in an ISO9001, ISO22000 (FSSC22000) cGMP and GLP certified facility. Our group has several manufacturing facilities spread across the world, supported by toll manufacturers and representatives in UAE, Europe, Africa.

Sodium propanoate or sodium propionate is the sodium salt of propionic acid which has the chemical formula $\text{Na}(\text{C}_2\text{H}_5\text{COO})$. This white crystalline solid is deliquescent in moist air. Sodium propanoate Description. White crystalline solid or powder. Uses. Sodium propionate is used in bakery products as a mold inhibitor. Propionates prevent microbes from producing the energy they need, like benzoates do. However, unlike benzoates, propionates do not require an acidic environment.

Sodium propionate has been used as a supplement in transgalacto-oligosaccharides (TOS) medium for the isolation of bifidobacteria. It has been used as a supplement in SCFA (short-chain fatty acid) diet prepared for mice. Packaging. 1 kg in poly bottle. 100, 500 g in poly bottle. Safety Information. Pictograms. GHS07. [blog](#)
