Stanozolol is a dihydrotestosterone (DHT) based anabolic steroid. Specifically, Stanozolol is a structurally altered form of the DHT hormone, two specific changes to DHT that give us Stanozolol. The first modification is the addition of an attached pyrazol group at the A-ring in place of the 3-keto group. This makes Stanozolol a heterocyclic.

This injectable Stanozolol suspension is manufactured by Spectrum Pharma and distributed in multidose vials holding 10 ml. The concentration of Stanozolol in this product is 50mg/ml. In bodybuilding Stanozolol is used for burning fat and removing excess water from a body within cutting cycles. In addition, it helps to get lean and strong muscles.
