NEW YORK & MIAMI---- Pfizer and OPKO Health, a once-weekly injection to treat The study met its primary endpoint of NGENLA non-inferiority compared to GENOTROPIN,

Current Status of Biosimilar Growth Hormone

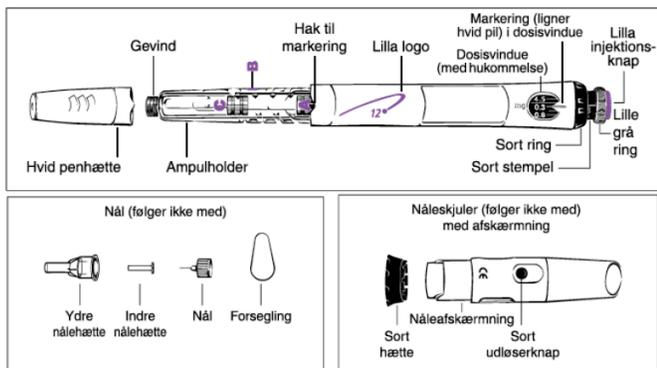

The effect of Omnitrope (Covance) was compared in 89 naive children with GHD to Genotropin (Pfizer). Efficacy was similar, the Covance formulation however led to a high titer of GH antibodies (ABs) (60%). GH is administered in an unphysiologic fashion, that is, by subcutaneous injection, there will therefore always be low level AB.
