

Is anavar bad for the heart?

How long can you stay on anavar?

Anavar cycles of **6-8 weeks** are usually safe.

What are the benefits of taking anavar?

This medication is used to **help people regain weight they have lost due to** certain medical conditions (such as surgery, chronic infection, trauma, long term use of corticosteroid medication such as hydrocortisone/prednisone). It is also used to relieve bone pain due to bone loss (osteoporosis).

What happens when you stop taking anavar?

Do not increase your dose or use this drug more often or for longer than prescribed. When an anabolic steroid is misused or abused, you may have **withdrawal symptoms (such as depression, irritability, tiredness)** when you suddenly stop using the drug. These symptoms may last from weeks to months.

What's the half life of Anavar?

Oxandrolone

How long before you see results on Anavar?

With an Anavar cycle of **six to eight weeks**, you should notice that you are gaining harder, leaner muscle. Such results should come with a daily dose of 60 mg to 80 mg.

Should you take Anavar once or twice a day?

Anavar is to be taken **twice a day** with the above-recommended dosage broken up into two instances: in the morning and the evening along with food.
