## How often should I inject test cypionate?

This medication is given by injection into the buttock muscle as directed by **your doctor, usually** every 1 to 4 weeks. Do not inject this medication into a vein. Dosage is based on your medical condition, testosterone blood levels, and response to treatment.

## How long does it take testosterone cypionate to peak?

Levels of circulating testosterone peak within **10 to 12 hours** of initial administration, and reach steady state within 24 hours (14).

## How long does test CYP stay in your system?

Testosterone is metabolized to various 17-keto steroids through two different pathways. The half-life of testosterone cypionate when injected intramuscularly is **approximately eight days**.

## What is the fastest acting testosterone?

In comparison to testosterone enanthate and testosterone cypionate, **testosterone propionate** is a faster-acting form of the androgen testosterone. Testosterone propionate possesses a half-life of roughly 2-3 days.

## Is 1 ml of enanthate a week enough?

1 ml per week is **200 mg per week** of testosterone. This is a replacement dose not shown to increase lean mass significantly in the short term. However, using higher doses may also increase red blood cell production and blood viscosity, so your doctor needs to monitor your hematocrit blood levels.

## Is testosterone enanthate good for bodybuilding?

Testosterone enanthate is also known as testosterone heptanoate . It is an anabolic and androgenic steroid (AAS) drug used to **treat low testosterone levels**. Anabolic drugs work by building muscles, while androgenic means it enhances sex characteristics usually associated with males.

## Is it better to inject testosterone once or twice a week?

If you injected 100 mg on at the beginning of the week and another 100 mg towards the end of the week, your peak isn't as high and your low isn't as low. **Twice per week** is preferred for the balance of testosterone delivery.
