Can you go to jail for taking steroids?

Laws and penalties for anabolic steroid abuse

The possession or sale of anabolic steroids without a valid prescription is illegal. Simple possession of illicitly obtained anabolic steroids carries a **maximum penalty of one year in prison** and a minimum \$1,000 fine if this is an individual's first drug offense.

How much does HGH cost?

You can expect to pay **\$1000 to \$5000 a month** for injectable HGH from a legitimate company. This depends on the size and potency of the dose needed. You may pay less with internet or out of country purchases, but should be wary of “deals” too good to be true.

Is testosterone a controlled substance?

The Anabolic Steroids Control Act of 1990 placed AAS, including testosterone, in **Schedule III of the Controlled Substances Act**. Testosterone and other AAS are abused by adults and adolescents, including athletes and body builders.

Is HGH the same as GH?

Growth hormone (GH) or somatotropin, also known as human growth hormone (hGH or HGH) in its human form, is a peptide hormone that stimulates growth, cell reproduction, and cell regeneration in humans and other animals. It is thus important in human development.

Can HGH make you taller after 25?

Long-term use of HGH injections can cause a condition called acromegaly. **Adults cannot grow taller by using the synthetic growth hormone**. High doses will thicken the person's bones instead of lengthening them.

How bad is HGH for you?

High levels of human growth hormone over a long period can **produce irreversible acromegaly**, but even smaller doses can lead to complications such as heart disease and diabetes. And because these hormones must be taken as injections, there are further administration risks such as a blood clot or dose error.

Does HGH stop testosterone production?

Weighing the Benefits and Risks of HGH Treatment

First, it's important to point out that HGH has very little—if any—impact on testosterone levels, as this particular protein is not involved in the production of testosterone. In the most literal sense, **HGH is not an effective treatment for low testosterone**.

Why is growth hormone banned in sports?

This form of hGH has a sequence identical to the naturally occurring 22 kDa hormone. Its misuse has been suspected in sport **because of its anabolic properties**. Athletes and bodybuilders claim that hGH increases lean body mass and decreases the fat mass.

When is the best time of day to inject hGH?

Since insulin performs its most important function shortly after a meal, it is important that HGH injections be taken **several hours after the last meal of the day**. By injecting the hormone shortly before sleep, the body is able to maximize the effects using the natural cycle.

What is the name of human growth hormone?

growth hormone (GH), also called **somatotropin** or human growth hormone, peptide hormone secreted by the anterior lobe of the pituitary gland. It stimulates the growth of essentially all tissues of the body, including bone.
