Is growth hormone a protein or steroid?

Growth hormone is a **protein hormone** of about 190 amino acids that is synthesized and secreted by cells called somatotrophs in the anterior pituitary. It is a major participant in control of several complex physiologic processes, including growth and metabolism.

Is estrogen a steroid?

As the primary **female sex steroid hormones**, estrogens and progesterone play important roles to regulate growth, differentiation, and function of a broad range of target tissues in the human body and maintain the function of female reproductive tissues.

Can you go to jail for steroid use?

Laws and penalties for anabolic steroid abuse

The possession or sale of anabolic steroids without a valid prescription is illegal. Simple possession of illicitly obtained anabolic steroids carries a **maximum penalty of one year in prison** and a minimum \$1,000 fine if this is an individual's first drug offense.

When do doctors prescribe HGH?

HGH injections are designed for **adults or children who have a lack of growth hormone** and should only be prescribed by a doctor. Children and adults with low levels of growth hormone should ensure they have plenty of sleep, a balanced diet, regular exercise, and that they follow medical advice.

Does HGH shorten your life?

Other research has shown that people with low levels of HGH due to surgical or radiation damage to the pituitary gland that makes HGH have **increased risk of cardiovascular disease**, a factor that can shorten life span.

Is growth hormone bad for your heart?

GH excess (**acromegaly**) results in cardiac hypertrophy that can progress to cardiac failure. Treatment with octreotide at least partially reverses cardiac hypertrophy and dysfunction. GH treatment may induce beneficial cardiac hypertrophy in adults without GHD who have dilated cardiomyopathy.

Does HGH damage your liver?

HGH prompts the liver and other organs to make IGF-1, which affects many tissues and organs in the body. Studies usually measure IGF-1 rather than growth hormone directly because IGF-1 levels remain more constant.

Will HGH show up on a drug test?

hGH in urine is found in extremely small quantities (less than 1% than that found in blood), and not much information is available regarding the excretion of different hGH isoforms in urine . Research efforts undertaken to develop urine-based detection methods for **hGH have been unsuccessful so far**.

Is somatropin the same as HGH?

Somatropin is identical to the endogenous pituitary-derived hGH, whereas somatrem has an extra amino acid on the N-terminus. Both synthetic forms have similar biological actions and potencies as the endogenous hGH polypeptide.

Can you buy real HGH?

HGH sold online as anti-aging pills, sprays, liquids, creams and other supplements do not contain real HGH and can be purchased from many websites without a doctor's prescription. To buy real HGH injections, **you must have a prescription from your doctor**.
