# Importancia del Control Hormonal

## ¿Qué es el Control Hormonal?

- La producción de hormonas está regulada por un sistema de retroalimentación, de tal manera, que cuando la cantidad de una hormona, se inhibe su producción.

## ¿Cómo detectar cuando hay un desequilibrio hormonal?

- Hay signos evidentes para detectar que un individuo tiene un desequilibrio hormonal. Estos síntomas pueden aparecer de forma repentina como cambios de humor, pérdida de peso, como acné y sarpullido, flujo menstrual abundante, dolor de vientre o en los ovarios y depresión o angustia.

Boldenone 250 is a highly anabolic and moderately androgenic steroid. Its primary use is in veterinary medicine most commonly with horses, but has become a favourite of strength athletes and bodybuilders. There is very little aromatization related to the compound with a very limited amount of water retention experienced by most users.
