HYPERHIDROSIS TREATMENT

Many suffer from a condition called hyperhidrosis which involves excessive sweating of the hands, feet, scalp and especially underarms.

Botulinum toxin is a versatile medication that can stop those troublesome, overactive sweat glands in their tracks.

Optimal for efficacy and safety for the body dose of Testo-Cypmax: a weekly dose of 250-500 mg. Increasing the dose of Cypionat is not justified and is fraught with unpleasant consequences. Buying anabolic steroids should be on the basis of a cycle of 8-10 weeks. Testo-Cypmax cycle requires the mandatory use of anti-estrogens (Clomid, Nolvadex).
