Anadrol vs Dianabol When comparing these 2 compounds, milligram per milligram, you would notice that Anadrol is more powerful than Dianabol, it can be noticed on paper numbers, and when administering it. The best stack combination is probably a mix of Dianabol and Anavar as opposed to a mix of Anavar and Anadrol. Although the Anavar/Anadrol combination is effective faster, it will cause a drop in the levels of estrogens. One must be aware of this before they delve into their 2-week cycles.

Dianabol, known as dbol, is very similar to anadrol, being one of the best bulking steroids on the market. Dianabol was originally formulated by Dr John Ziegler, to help the Americans defeat the Soviet's in the Olympics. It became known that the Russians were using testosterone, aiding their dominance. Seen good feedback across the web and I've done it myself dosed at roughly 50/50 split, took 25mg oxys & 20mg dbol a day for 6 weeks alongside test & deca. That said, I wouldn't mix them until you've used both separately.

Please join this discussion about Dianabol mix Anadrol?? within the Anabolic Steroids category. Excerpt: 4 weeks into my dianabol cycle, I am taking 50mg of Diana a day. I have 7days left on this cycle. For these last 7 days can I add 50mg of Anadrol a day (anapolen) with out any worries? That's 100mg in total. Due to my school issues, I've not been able to write or post on my blog so I arranged for a guest post. My first guest post on the blog actually so it was a big step but I hosted it anyways. Dianabol (methandrostebolone) was first made in 1956 by John Ziegler of Ciba fame. Dianabol has been one of the most popular oral steroids of all time, exploding in popularity in the 1970s with bodybuilders and football players and expanding into all avenues of athletics during the 1980s.
