Oxymetolone is available in the form of injections and tablets with dosages of 50 mg each. A dose of 50 to 200 mg per day is often used, and the product must be divided into two to three doses. Strangely enough, the medicinal dose of the drug is much higher than the sports dose. It is 1-5 mg per kg of weight per day. Using this recommendation ... Depression and Obsessive Compulsive Disorder for depression and OCD, the usual effective dose is 50 mg/day. The daily dose may be increased in 50 mg increments and at intervals of at least one week over a period of weeks. The maximum recommended dose is 200 mg/day. Tomorrow I plan to babysit all day and do some serious work for for the next week and a half, alongside SERIOUS triathlon training before a yogi and boozy weekend in London again. My best advice ALWAYS will be: stop waiting to live!! FCKINGGG LIVEEE
