## Frisian Dew Strain Review - I Love Growing Marijuana

Grow style	Started under 400w HPS, finished under 300W LED. Deep water culture hydro, Hailera V-60 60LPM air pump and two large air stones.
Light cycle	20 hours lights on, 4 hours darkness
Time to harvest	79 days from germination to harvest
Temperatures	Constant 20°C
Nutrient regime	Advanced Nutrients Sensi A and B Grow and Bloom with boosters, big bud, bud candy, B-52, root stimulator, overdrive, and bud ignitor, and some silica blast in the first three weeks of the grow. Mature StarRyder was able to take an EC of 2.0 +
Grow room	Home built grow box 180cm x 180cm x 90cm, temps stable at 20°C
Yield	236g (best ever result for this grower from a Dutch Passion auto variety). "Very strong"
Growers comments	Easy variety to grow, would suit new growers or experienced growers StarRyder can handle strong nutrients near the end Easy to trim

Dutch Passion Seed Company has been around for It is also among the most recognizable names in the After having won countless awards worldwide, one would think that they have seen it Apparently, though, that is not always the case especially when they first laid eyes on the Frisian Information about Frisian Dew: Effects

# Frisian dew seedsCOM

Strain	AutoMazar® & Think Different
Genetics	AutoMazar – Original Dutch Passion Mazar® in an auto form. Think Different – AK420 (elite DP hybrid of AK420) in auto form
Light regime	24 hour light for first week, then 20 hours on/4 hours off for entire grow
Light used for seedlings	400w metal halide for first 3 weeks
Lights (bloom) in 1.2m x 1.2m tent	1000w HPS
Lights (bloom) in 90cmx90cm tent	600w HPS
Initial nutrient details	EC 1.2, pH 5.8, temps 24°C. Nutrients gradually increased in concentration as grow progressed.
Nutrients around week 7-8	EC 1.8-1.9 'pk' bloom boost also used
Grow Method	Coco fibre in 11 litre pots
Temperatures	24-25°C typically, occasionally 29°C
Grow technique	SCROG (screen of green). Plants are trained underneath a net to give an even canopy and maximise light efficiency
Grow time	11 weeks
Additional nutrients	roots stimulator + enzyme
Yield	800g total / 28 ounces from 10 plants

Frisian Dew is a perfect cannabis hybrid with a fresh, fruity, floral taste and Some phenotypes smell a little more of earth, ammonia, and herbs - an inherited trait from her Skunk Their mild terpene profile provides a pleasant smoking The Dutch cannabis plant is widely known for its large

## Top 8 Dutch Passion Cannabis Strains - Zamnesia Blog

Type of grow	Soil, in 15 litre airpots with Plagron Light soil
Lighting	LED panels from Grow Northern, MS004 (120W) for first half of the grow and MS006 (200W) for the rest of the grow
Nutrients	Advanced Nutrients ('AN') Sensi Grow and Sensi Bloom. Root and bloom additives also from AN
Growers comments	More light in bloom would have produced bigger buds
Yield	6 ounces / 168 grams in 90 days
Aroma	Low aroma plant until end of bloom, with a smell of citrus and freshly cut grass

Frisian Dew Another strain first conceived for growing outdoors in the cooler regions of Europe, Frisian Dew is a 50/50 hybrid with well-rounded Happy growing outdoors, this strain is highly resilient, mould resistant, and able to put up with most novice It makes her a great strain for first time outdoor

# Frisian Duck: A New And Revolutionary Strain From Dutch Passion - Zamnesia

Summary of grow conditions	
Veg growth	41 days
Bloom time	68 days, but during the last 12 of these days only water was given to the plants ('flush')
Flush	Reverse osmosis ('RO') water used during flush to assist salt removal. 1 ml/litre of canna flush used for first 4 days
Soil	John Innes with vermiculite and lime-free sand
Final flowering nutrient strength	Final flowering Ec was 1.042 (or 994 ppm). Background reading is 0.375 Ec (or 250 ppm) 3mm tip burn (on leaf) was seen at final EC
Water details	RO & Tap water were rested ('conditioned') to ambient air temp, & de- & re-gassed using Hallee ceramic stone for 30hrs before use. This gives 35litre/min of air.
Genesis Nutrient ratio during flower	1.5 part micro base + 2.5 parts bloom base. Carbo load was given throughout 12/12 to the end, every 3rd watering.
pK13/14	Used at 200ppm for the last 4 weeks of bloom. Note that for the last 12 days the plants were flushed with pure RO water
Plant hight	At the end (109 days total) average was 1.3m tall. Biggest plant was 1.6m
Lights	Photon 189
Seed germination rates	90% after 8 days
Harvest details	Average 117g (highest 178g, lowest 89g)

It is a revolution in cannabis breeding and genetics, and will be a powerful weapon in the hands of any grower, especially those of the guerrilla It can sit comfortably in the corner of any garden, field or forest without drawing too much View Frisian Duck (Dutch Passion) feminized (22) Parents: Frisian Dew x DucksFoot

## Must-Try Strains From Dutch Passion

Grow system	Soil grown under 2x600WHPS light. Supplemental CO2 supplied via portable gas fire used for heating the room
Initial soil and germination	Plagron Light soil mix, grown under T5 Fluorescent tubes, fed with 2ml/litre seaweed solution (same solution also used as foliar spray)
Lighting regime	20 hours lights on (temp 25°C) and 4 hours lights off (temp 21°C)
Final soil and pots	Levington M3 Pot & Bedding compost in 14 litre containers
Nutrients	Seaweed extract used for first 6 weeks. 'Hesi' soil bloom used at rates of up to 5ml/litre during rest of grow. Cannabis King comments that StarRyder is happy with strong nutrients towards the end of the 10 week life
Plant structure	Reached 130cm tall in the 14 litre pots. Typical 'auto' structure - one main bloom surrounded by shorter blooms
Special comments	Get the StarRyders into their final pots as soon as possible, bigger pots=bigger plants. Look out for the pineapple-scented StarRyder!

The list below compiles the best consumer favorite Dutch Passion strains, all available for purchase at Orange Bud Orange Bud is a widely popular Dutch Passion strain introduced in the This strain was immediately accepted by cannabis growers as soon as it was introduced due to its high quality and pleasant citrus

# What do Purple and Red Cannabis Stems Mean? | Dutch Passion

Grow lights	2x 600 watt HPS
Grow medium	Coco fibre from Plant Magic in 7.5 litre pots
Seedling feed	Formulex
Plant feed	Canna coco feed 'part a + part b'
Bloom booster	pK13/14
Yield	Approx 4 ounces (~115g) per plant of dried buds
Growers comments	Jorge's Diamonds coped well with cold weather Very resinous buds Use a good carbon filter, very strong aroma during bloom

So too are some outdoor cannabis seeds such as Purple #1, Shaman, Frisian Dew and other members of the Dutch Outdoor cannabis seed Grow your own colourful cannabis! If you adore the added appeal of purple and red stems when growing cannabis you are in good company!

## Buy Dutch Passion Durban Dew for sale at Cannabis Seeds Outlet

Grow system.	Plagron 'Light soil mix' in 10 litre Airpots
Lights	Grow Northern 200w LED MS006 and Hydrogrow 120w LED 84x Pro
Nutrients.	Advanced Nutrients pH perfect Sensi Grow/Bloom A + B, Sensi Cal Grow/Bloom, B-52 Bud Candy Voodoo juice, Carbo Load, RhinoSkin & Sensizym Then depending on stage of bloom: , BigBud, HammerHead 4/10 or Overdrive.
Light system	20 hours lights on, 4 hours lights off. This is the standard approach used for automatics throughout the grow, from seedling to harvest
Harvest details	Plants harvested 84 days (12 weeks) after germination. Plant 1 produced 170g of dry bud, plant 2 produced 150g of dry bud.
Grower comments	Easy to grow and look after. Able to take strong nutrients near the end. "..hardest buds I've ever grown or held". "tastiest auto ever smoked" "StarRyder along with Think Different are the two strongest auto I've ever smoked.. Period." "very strong smell in bloom, needs a good carbon filter"
Tips	StarRyder responded well when tied down to allow better light penetration to the lower branches ('LST' or low stress training) but the other plant yielded well even without LST StarRyder needs support when flowering to prevent branches snapping

Durban Dew Feminized Dutch Passion Seeds is a brand new cannabis strain added to our site in late We are in the process of updating the full strain information so please check back We hope to have this fully updated within a few This will be an original branded pack of Data sheet BrandDutch Passion ReferenceDP12632

## Durban Dew by Dutch Passion Seeds from Seed City

Grow Method	Soil ('Plagron Light mix') in 7.5 litre pots. 600W HPS light
Harvest	Around 450 g in 70 days, 6X StarRyder and 1xTaiga #2
Plant hight	1 metre
Nutrients	BioBizz Fish Mix & Bloom
Grower tips	Keep it simple, StarRyder is easy to grow. She likes strong nutrients near the end
Germination	Root Riots 'starter cubes' recommended to ensure good germination rates
Smoke strength	"deadly"

Durban Dew is a fusion of two original Dutch Passion classics, Durban Poison and Frisian Both cannabis varieties are known for an exceptional and unique terpene By crossing these two strains we have managed to create a very tasty cannabis It usually has a soft and sweet

## Dutch Passion Seeds Not Germinating - Seeds Not Germinating: Why Did

Grow system	5-plant Screen of green ('Scrog'). 300 litre nutrient reservoir. 1.2m x 1.2m screen
Lighting system	2x 1000w metal halide initially. Lights switched to 2x 1000w HPS after vertical stretch ended. Lights on a permanent cycle of 20 hours light followed by 4 hours dark
Nutrient consumption	Think Different loves heavy feeding, up to 1150ppm. Mature females drunk 5 litres (1 gallon) per day during bloom and peak consumption was just under 10 litres per day (2 gallons)
Growers comments	Think Different was a low-odour variety. At harvest citrus-fruit was the dominant aroma. Best yields from Think Different come from a combination of hydroponics and SCROG. 'Use as much light as you can'
Yield	2.2 Kg (just under 5 pounds) from 7 Think Differents. 5 of the Think Differents were in a SCROG, the other two plants were in DWC buckets nearby
Type of high	Uplifting, smooth, long lasting. Dense buds but not very smelly. Good medical feedback from several users.
Would you grow Think Different again?	Yes!

The Best Outdoor Cannabis Seeds Per Climate In Europe Frisian Dutch Passion's award-winning Frisian Dew was made to be grown outdoors, including in colder regions of the A robust combination of Purple Star and Super Skunk, this 50/50 indica/sativa strain takes only 7-8 weeks to flower, which makes her a top crop for

## Dutch Passion Seed Company Review - Dutch Passion Review 2022 |

Light	400W HPS with parabolic reflector
Stretch during bloom	Plant tripled in size during bloom
Grow method	Coco coir fibre. 3.5litre container initially, 6 litre final size
Bloom Period	7½ weeks
Yield	200g approx from 4 plants
Comments	Watch out for bud-rot in large buds at the end of flower
	Plants withstood 38°C (100°F) indoor summer temperatures for 2 weeks
Special Pheno	Lemon scented phenotype with big buds, find it and keep it!

The Power Plant seeds you get from Dutch Passion are purebreds that have not been As a result, these plants grow consistently and uniformly when you have the It is highly stable and offers an excellent yield if grown You can grow it indoors or outdoors, and it flowers relatively quickly as Power Plant Strain >> Complete Guide & Review

# Dutch Passion - Growing Competition 2022 - UK420

Germination	1" (2.5cm) rockwool cube soaked in pH 5.6 water/Rhizotonic mix
Grow system	Deep water culture (DWC) with a 20 litre 'oxipot' grow bucket using 60 litre per minute air pump & rubber tubular air diffusers
Lighting	500W LED light from 4x <a href="#">Hydrogrow 84</a> LED
Nutrients	Genesis 3 part nutrient line. With Carboload in bloom & superior potash for her PK boost Initial EC was 0.8 EC was raised by 0.2 per week. Final EC was 3.0 (!)
Yield	310g harvested after 90 days
Special comments	The growing tip of the plant was removed on day 28. This was an experiment by the grower to create a bushy plant with heavy yields (it worked)

Dutch Passion - Growing Competition 2022 - Outdoor/Guerilla - strains: Durban Dew, Passion #1, Hollands Hope, Frisian Dew, Think This is the new outdoor thread for the Dutch Passion twenty-twenty-two Growing Competition so welcome to you all and please join Glad to hear you've already received the seeds!

## AutoFrisian Dew durch Dutch Passion Seeds von Seed City

Light	250W dual-spec HPS in a 60cm x 60cm x 140cm indoor tent
Grow style	3 plants grown in 7.5 litre compost containers with a 'SCROG' screen to maintain an even canopy. The plants were topped after 24 days in veg. (topped=removal of growing tip to produce bushier plant growth)
Veg	Night Queen's spent 50 days growing in 'veg' mode under 18/6 light while the grower finished his Dutch Passion StarRyders. Then the Night Queens were switched to 12/12 lighting and flowered for 9 weeks
Nutrients	Plant Magic soil, Plant Magic granules (Mycorrhiza), bio-silicon, Plant Magic bloom and veg nutrients
Stone	'kick ass', 'incredibly smooth'
Remarks.	NightQueen required slightly longer to trim due to the leafy indica structure

\$07 AutoFrisian Dew Cannabis Samen von Dutch Passion Seeds AutoFrisian Dew wurde modernisiert und verbessert, ist es nun basierend auf einem speziell ausgewählten Lila Phänotyp unserer Photoperiode Frisian Mehrere Generationen von sorgfältige Auswahl folgte dann, bevor wir mit den Verbesserungen zu AutoFrisian Dew glücklich fü

## Cannabis Seeds The Strains Dutch Passion Discount Cannabis

Grow method	DWC (deep water culture) using 20 litre containers. Seeds germinated in rockwool cubes and placed into DWC system
Lights	300W LED from Hydrogrow
Light cycle	20/4
Nutrients	Genesis Nutrients, @pH 5.8 (approx) throughout, with pK13/14 boost for bloom
Yields	Plant 1 - 228g. Plant 2 -160g
Growers comments	Enjoy the Tangerine phenol of SnowStorm #2 if you find her

Frisian Dew cannabis seeds is fully proven over many She grows well at Dutch (and similar) outdoor altitudes and is able to grow as far north as Northern England and Southern She is usually ready for harvest around early October and in optimum outdoor conditions (or in a greenhouse) can yield a Kg or two of dried

## Interview with dutch passion - CannaConnection

Light	1250w HPS (600w air cooled, 400w & 250w)
Containers	10 litre plant pots
Nutrients	General Hydroponics FloraDuo A/B with Floralicious+, Liquid Koolbloom, and Calimagic (Cal/Mag supplement).
Grow method	Hydro 'ebb & flow' technique (roots systematically flooded with nutrient solution which then drains away). SCROG system. Scrog net 30cm above soil level
Life cycle, seed to harvest	80 days
Yield	650g (22.8 ounces) dry weight from 5 plants, all branches removed.
Comments	General Hydroponics Bloombooster made a big contribution to yield
	Pests (root aphids) were a slight issue on this grow
	Air conditioning used in room to moderate temperature
Recommendations to other growers	Calcium/Magnesium supplements were felt to be important to the final harvest quantity.

The Frisian Dew has 2 phenotypes; a green one that is really strong with a high THC And a purple one that is a bit less strong but more We chose to keep those 2 different phenotypes because most growers like to have a combination of 2 phenotypes in a The plants get really

## Frisian Duck Strain Review 2022 Updated Guide! - I Love Growing Marijuana

Germination method	Seeds soaked in water for 24 hours then germinated in 'Root Riot' seedling cubes
Grow method	Soil grown, 14 litre Airpot.
Soil	Plagron Light Mix
Lighting	Grow Northern LED, 2 x Ms006 180 Watt.
Nutrition	Advanced Nutrients, peak feeding was EC of 2.0, 3 litres per day
JTang tips	Use biggest pots for best yield and consider SCROG or LST Tie the side branches to the main stem to prevent breakage
Seed – harvest time	84 days
Yield after drying	303g

One of the oldest and most reputable breeders in the industry is Dutch Among their most revered creations is the Frisian It is a durable marijuana plant that thrives well in cooler climates and comes with purple or green Furthermore, this balanced cannabis delivers an intense cerebral high that induces

## frisian duck seedsCOM

The Frisian Duck is a robust crossing between the Frisian Dew and the DucksFoot and can reach a height of 5 metres when the plant is grown In the greenhouse you may count on a height of 5 Striking to the Frisian Duck is the purple colour the plant shows during its flowering More info about this cannabis seed

# dutch passion marijuana seedsCOM

Grow method	2 plants grown under 2x400W HPS lights alongside other varieties. 8-inch Etaline fan & 8-inch Rhino filter.
Grow medium and nutrient details	Plagron light mix soil with HESI nutrients, 1 litre pots initially. Also used was Root-complex, Powerzyme and Supervit.
Vegetative growth details	Final pot size was 11 litres using 'Royal mix' soil. Seedlings started under T5 fluorescent tubes for 11 days and then placed under a 250w metal halide veg lamp.
Typical temperature & humidity	Total vegetative growth of 7 weeks. Temps are 22°C (lights off) and 29°C (lights on) Humidity is 44% and 79%
Flowering Time	8 weeks. Grower felt 9 weeks may have been slightly better. Plants doubled in height during bloom.
Yield	250g of dry bud after 10 days drying
Potency	10/10

Dutch Passion was formally established as a cannabis seed supplier in the 1980's and is proud to remain one of the oldest seed companies in the Today Dutch Passion sell cannabis seeds to many of the licensed, legal cannabis producers as well as the community of home growers around the

## Durban Dew Feminized by Dutch Passion

Grow System	Deep water culture ('DWC') bubbler
Lighting	3x 600w HPS & 1x 300w Plasma. Lights on for 20 hours and 'off' for 4 hours (standard for auto's)
Germination	Seeds placed in 'Root Riot' sponges and under Plasma light & T5 Fluorescent colour 860. Then transplanted into Grodan blocks and put into DWC buckets
DWC aeration system	8 buckets were supplied with air via 'Hailea 150mm' airstones and a silent ACO 9820 airpump.
Nutrient system	Plants were given Dutch Pro's special Autoflower grow formulation initially and when the plants went into flower (after 3-weeks) were switched to Dutch Pro Autoflower bloom and Dutch Pro Explode bloom booster. pH & EC were checked twice each day, morning and night.
Supplemental feed	Canna Calcium and Magnesium given in the middle of each week (fast growing cannabis often needs extra calcium/Magnesium supplements)
Harvest	1 plant harvested 75 days after germination (172g). Remaining plants harvested around 100 days. Yields from the plants were 316g, 284g, 540g, 274g, 548g, 476g & 340g
