The injectable form of Stanozolol is a water based anabolic steroid that is derived from DHT(Dihydrotestosterone) Unlike most injectable Stanozolol injections should be administered intramuscularly Men: 100-200 mg per week Women: 25 50 mg per week Shake gently before use. Stanozolol is used in the treatment of hereditary angioedema, which causes episodes of swelling of the face, extremities, genitals, bowel wall, and throat. Stanozolol is being investigated for use in the treatment of COVID-19 complications.

Winstrol is the most widely recognized trade name for the drug stanozolol. Stanozolol is a derivative of dihydrotestosterone, chemically altered so that the hormone's anabolic (tissue-building) properties are greatly amplified and its androgenic activity minimized.

SWIS 2018 Video Clips... Victorian Felkar discussing how steroids for women has gone from making you a male beast to almost normative and making you sexy...even touted as a fat loss tool on google..what the heck happened... 1 minute 54 seconds long Stanozolol Injectable 50 is indicated prophylactically to decrease the frequency and severity of attacks of angioedema. It is also indicated breast cancer in postmenopausal women, and for anaemias, osteoporosis, and catabolic disorders.
