GoldenEye 007 for the Nintendo64 changed the face of gaming forever. The game toppled the fixed-rail-shooter, that we used to see in Doom and Virtua Cop, for its more free-wheeling and realistic shooting experience. Nintendo64 controller offered the buttons and joysticks that enabled more actions like crouching, climb, hide, and not just crazily running forward. This axis perception and new points of view changed entirely how an FPS game could be designed, raising GoldenEye 007 as one of the most important games of video game history.
