CJC 1295 without DAC is a 30 amino acid peptide hormone, better known in the community as a GHRH (growth hormone releasing hormone). CJC 1295 also helps injury recovery times, reduce body fat, boost immune system and bone density and cellular repair (skin and organs). This not so common DNA structure may play a vital role in cancer. The presence of 4-stranded DNA has been attributed to the rapid division of cancer cells. So targeting them with drugs might slow down the process. CJC-1295, also known as DAC:GRF (short for drug affinity complex: growth hormone-releasing factor), is a synthetic analogue of growth hormone-releasing hormone (GHRH) (also known as growth hormone-releasing factor (GRF)) and a growth hormone secretagogue (GHS)...

It's really tough but knowing I only have to do one more day of this is spurring me on to get it finished. Its taking everything I have to get each day finished but I'm so close to the end I can taste it. 1 DAY TO GO!!! CJC-1295 DAC from Hilma Biocare is a modification of the CJC-1295. The DAC (Drug Affinity Complex) extends the half-life of the product for a period of close to a week. The advanced Hilma Biocare technology allows to obtain a CJC-1295-DAC peptide with a high purity of 99.05%. If you suffer from migraines, IV ketamine may be just what you've been looking for! When infused at a low dose slowly into the bloodstream, ketamine has been associated with a 50% reduction in acute migraine attack pain compared with a placebo, AND has shown an approximate 75% reduction in chronic migraine pain in 7-10 day follow-up! [have a peek at these guys](#)
