I asked my athletes recently what motivates them as a person and as an athlete. Some said similar things for both. Some gave a deep answer, others gave a simplistic 'to be better'. The motivation of your why is as individual as how your squat will look.

I was blown away with how well it worked and how much sweat came off me during my cardio. It was insane!! I instantly ordered the leg wraps as well. I did test the wraps without wearing the special sweat intensifying serum however did not sweat nearly as much if any at all. It's definitely became a staple for my cardio routine and I just don't feel like I've gotten in a good enough workout without it.

Anabolism requires energy to grow and build. Catabolism uses energy to break down. These metabolic processes work together in all living organisms to do things like produce energy and repair cells.

Conclusion : manger peu, chez un sujet sain, n'ayant pas fait de régime drastique auparavant, fonctionnera mais n'est pas conseillé. Plus vous multipliez les régimes, plus difficile est la perte de graisse. Avec le temps vous diminuez votre masse musculaire, si importante pour le métabolisme. Bref, osez monter vos apports pour alimenter votre métabolisme le temps nécessaire pour pouvoir observer une amélioration de la perte de poids, associé à une pratique physique.
