Take my sessions today my biggest progression was adding 1.25kg to this for matched reps, nothing massive and I had to work for it but it's still a win  
It's not often I film myself in the gym but I was SO chuffed with this (also lets try and ignore my facial expressions here - did you really give it your all if you didn't pull weird facials during a session?)

Stanozolol is a man-made steroid, similar to the a naturally occurring steroid testosterone.. Stanozolol is used in the treatment of hereditary angioedema, which causes episodes of swelling of the face, extremities, genitals, bowel wall, and throat.Stanozolol may decrease the frequency and severity of these attacks.  
The result of catabolism is the formation of energy and substances necessary for the course of anabolism. At the same time, in the process of anabolism, the supply of substances that are required for catabolic processes occurs.

# Protein requirements to maximize anabolism in trained men is greater than current recommendations

THE JOURNAL OF NUTRITION

I had to let go of the expectations I set for myself, and let myself heal on my own time. And I'm glad I did because I feel super excited to workout consistently again and make progress now.

Stan-Max (stanozolol injection) is an injectable form of a pill steroid that has a powerful anabolic effect. In bodybuilding Stanozolol is used to increase stamina, increase strength, and also to improve the drawing of muscles. After the injection, the active substance stanozolol immediately begins to affect the body, remaining active for 8 hours.
