Boldenone is a derivative of testosterone, which exhibits strong anabolic and moderately androgenic properties. The undecylenate ester (Boldoject 200) greatly extends the activity of the drug (the undecylenate ester is only one carbon atom longer than decanoate), so that clinically injections would need to be repeated every three or four weeks.

□□ □□□□□□□□? Dalla classe del buon Verhoeven, nel 1990, uscì uno dei film che merita di salire sul pantheon dei capolavori della mia epoca. Total Recall non è solo un film di fantascienza, è uno dei top di gamma della fantascienza.

Boldenone Undecylenate is a structurally altered form of testosterone. Equipoise shares many similarities regarding direct enhancement properties with testosterone. Common shared properties include its ability to enhance protein synthesis, nitrogen retention in the muscles, inhibit glucocorticoid hormones and increase IGF-1 output.
