

Testosterone Enanthate Te 300

[→ CLICK TO VISIT OUR ONLINE SHOP ←](#)

Testosterone enanthate is used in women to treat breast cancer that has spread to other parts of the body (metastatic) and cannot be treated with surgery. Testosterone will not enhance athletic performance and should not be used for that purpose. Testosterone Enanthate may also be used for purposes not listed in this medication guide.

Testosterone enanthate is an oil based injectable steroid, designed to slowly release testosterone from the injection site (depot) over a 20 - 28 day period with a half-life of 10 - 14 days. Testosterone exhibits a high tendency to convert into estrogen so estrogen related side effects may therefore become apparent.
